Professional Summary

Entry-level Cybersecurity professional with a Bachelor's degree in Cyber Security and Digital Forensics and a strong academic record (CGPA: 3.80/4.00). Experienced in network security, digital forensics, vulnerability assessment, penetration testing, and security monitoring through hands-on projects and professional internships. Passionate about threat detection, incident response, and protecting organizational assets. Seeking an entry-level SOC Analyst, Cybersecurity Analyst, or Network Security role where I can apply my technical skills and continue to grow as a cybersecurity professional.

Technical Skills

Digital Forensics: The Sleuth Kit (TSK), Volatility 3, Autopsy, TShark, Scapy, YARA, Memory Forensics, Disk Forensics, Network Forensics, Log Analysis, Evidence Correlation, Chain of Custody

Security Tools: Wireshark, Nmap, Metasploit, Burp Suite, OSINT Framework, VirusTotal, Hybrid Analysis, Process Monitor

Platforms & Environments: Kali Linux, Linux CLI, Windows Server, EVE-NG, VirtualBox

Programming: C++, Python, PHP, HTML, CSS, JavaScript, SQL

AI & Machine Learning: YOLOv8, LogBERT, Machine Learning, Data Science, Deep Learning Fundamentals

Cybersecurity: Digital Forensics, Incident Response, Threat Intelligence, Malware Analysis, Vulnerability Assessment, Penetration Testing Fundamentals, Network Security, MITRE ATT&CK, IoT Security, OSINT

Experience

Chairperson

IEEE ComSoc-UCET IUB

February 2026 – June 2026
Pakistan

- Leading the IEEE Communications Society student chapter, overseeing strategic planning, technical initiatives, and community engagement activities.
- Organizing seminars, workshops, and events focused on emerging communication technologies and cybersecurity trends.
- Coordinating with faculty, industry professionals, and IEEE representatives to enhance student learning and professional development.

Vice Chair

IEEE ComSoc-UCET IUB

December 2025 – February 2026
Pakistan

- Supported the Chairperson in managing chapter operations and executing technical and professional events.
- Contributed to event management, member engagement, and coordination of IEEE ComSoc activities.

Marketing Head

Center for Cyber Security and Digital Forensics (IUB)

2024 – 2025
Pakistan

- Led promotional campaigns for cybersecurity events and workshops.
- Managed social media, marketing materials, and event publicity.
- Increased student engagement through strategic outreach initiatives.

General Secretary

Center for Cyber Security and Digital Forensics (IUB)

2025 – 2026
Pakistan

- Managed official documentation, meeting minutes, and correspondence.
- Coordinated communication and administrative activities across teams.
- Organized workshops, seminars, and cybersecurity events.

Joint Secretary

Cyber Security Student Club (IUB)

March 2026 – June 2026
Pakistan

- Assisted in maintaining official records, documentation, and correspondence for the club.
- Managed internal records and ensured all documents were organized and up-to-date.
- Coordinated administrative tasks and communication between the Executive Board and club divisions.
- Drafted and circulated official notices, meeting minutes, and announcements.
- Supported planning and execution of workshops, guest lectures, CTF competitions, and social events.
- Promoted integrity, accountability, and adherence to the club's Code of Conduct.

Cyber Security Analyst

Pakistan Aeronautical Complex (PAC Kamra)

January 2025 – March 2026

Kamra, Pakistan

- Monitored and maintained enterprise-grade LAN infrastructure in a mission-critical defense environment, ensuring high availability and security.
- Configured switches, routers, and wireless access points; implemented VLAN segmentation for access control.
- Applied physical and environmental security controls to protect critical IT infrastructure.
- Collaborated with security teams to maintain stable and compliant network operations.

Cyber Security Analyst (Internship)

Corvit Networks

August 2025 – September 2025

Pakistan

- Assisted Security Operations Center (SOC) analysts in monitoring and investigating security alerts, supporting the identification and analysis of potential cyber threats.
- Performed log analysis and event correlation, contributing to incident triage, IOC analysis, and initial security investigations.
- Gained hands-on exposure to threat monitoring, vulnerability identification, and incident response fundamentals.
- Worked with network security tools and practiced security event analysis.

PHP Developer Intern

BixiSoft

September 2024 – October 2024

Pakistan

- Developed backend components using PHP and learned secure coding practices.
- Collaborated with developers to implement and test application features.

Projects

HawkEye: AI-Driven Digital Forensics and Threat Intelligence through MCP-Based Orchestration (Final Year Project)

2025 – 2026

- Developed an AI-powered digital forensics platform that automates evidence acquisition, analysis, and correlation across multiple forensic domains.
- Integrated forensic tools including The Sleuth Kit, Volatility 3, TShark, Scapy, and YARA for disk, memory, network, and malware analysis.
- Implemented AI modules for 6-layer steganography detection, YOLOv8 weapon/object detection, LogBERT-based log anomaly detection, and XceptionNet deepfake detection.
- Designed an MCP-based orchestration framework using JSON-RPC to automate and coordinate 44+ forensic tools through AI agents.
- Developed evidence correlation using hash, temporal, and semantic analysis, with LLM-powered MITRE ATT&CK mapping, attack narrative generation, and natural language investigation support.
- Automated HTML/PDF forensic report generation with chain-of-custody logging, achieving 93% deepfake detection accuracy, 90% steganography detection sensitivity, 100% recall for log anomaly detection, and 8–12 second PCAP analysis.

Network Simulation and Security Lab using EVE-NG

2024 – 2025

- Designed and deployed a virtualized multi-node network topology using EVE-NG, simulating real-world enterprise environments with routers, switches, and firewalls.
- Used the simulation environment to test network behavior under fault conditions and evaluate security configurations before deployment.

Network Intrusion Detection System with Snort and Suricata

2024 – 2025

- Deployed Snort and Suricata as NIDS to monitor network traffic; wrote custom rules to detect port scans, brute-force attempts, and suspicious payload signatures.
- Analyzed alerts and logs to triage true/false positives, strengthening threat analysis and security event triage skills.

Home Lab: Vulnerability Assessment and Penetration Testing

2024 – 2025

- Built a home lab with VirtualBox, Kali Linux, and Metasploitable to practice offensive and defensive security techniques in a controlled environment.
- Conducted vulnerability assessments using Nmap and Metasploit; captured traffic with Wireshark to identify credentials, anomalous sessions, and attack vectors.
- Documented findings in structured penetration-test reports, reinforcing a methodology-driven security approach.

Malware Analysis and Reverse Engineering

2024 – 2025

- Performed static and dynamic analysis using VirusTotal, Any.run, and Hybrid Analysis sandboxes to examine file behavior, network callbacks, and indicators of compromise (IOCs).
- Used Ghidra to reverse engineer sample binaries, identifying obfuscation techniques and extracting threat-relevant artifacts.
- Monitored malware behavior using Sysinternals (Process Monitor, Autoruns) to trace registry changes, file system modifications, and suspicious process activity.

OSINT Investigation and Threat Intelligence Research

2024

- Applied Open-Source Intelligence (OSINT) techniques to gather, correlate, and analyze publicly available information for simulated threat-actor profiling exercises.
- Utilized tools and frameworks to trace digital footprints, assess exposure risks, and produce threat intelligence summaries relevant to organizational security postures.

Education

Bachelor of Science in Cyber Security and Digital Forensics

The Islamia University of Bahawalpur

September 2022 – June 2026

Bahawalpur, Pakistan

- CGPA: **3.80/4.00**
- Relevant Coursework: Network Security, Digital Forensics, Ethical Hacking, Cryptography, Operating Systems, Database Management, Information Assurance.

Certifications & Awards

- Certificate of Appreciation – TechXhibit 2026 (Air University Multan)
- Shield of Appreciation – Chairperson, IEEE Student Branch
- Shield of Appreciation – Marketing Head, Center for Cyber Security and Digital Forensics (2024–2025)
- Shield of Appreciation – General Secretary, Center for Cyber Security and Digital Forensics (2025–2026)
- IEEE Communications Society: 6G Megatrends and Technology Enablers
- Cisco Introduction to Cybersecurity (Badge)
- OSINT (Open-Source Intelligence)
- IoT Ethical Hacking
- Windows Networking
- Data Science & Machine Learning (Dicecamp)
- Prime Minister's Youth Laptop Scheme (Phase III)
